Dear Jane

**Baka Garden Display Chelsea Flower Show**

Thank you for showing such an interest in the needs of the Baka people in the Cameroon. The area is a hot spot for biodiversity and a place where the UNESCO programme has an interest in safeguarding the culture and the environment of the indigenous tribes. Specifically from the Man and Biosphere Programme the Dja Biosphere Reserve is particularly special for its bio-cultural significance and the harvesting of medicinal plants.

Raising awareness of the needs of these people within the developed world is an important step to safeguarding the environmental and human rights of the people.

I wish you every success with the demonstration garden at the Chelsea Flower Show. If we can help with educational materials or other support please contact me.

Yours sincerely

Andy Bell
